Load capacity (=shelves + content) (kg)	5280	5280	6000

## Management software G-DOC

G-DOC, published by TEMREX, is best-in-class for managing your carousel storers in a demand-responsive way as well

- > automatic addressing and location management
- > traceability of consultations and borrowing of files
- > creation of files
- > remote monitoring of borrowers

## A 100% TEMREX service team

- > A national service network and a wide availability of parts to ensure a quick response time
- > A hotline for remote diagnosis and problem solving in many cases
- > Maintenance contracts adapted to ensure maximum availability

## 100% TEMREX solutions

Drawing on its experience and rigor, our team of designers today harmoniously combines technique and user-friendliness to offer you carousel storers dedicated to your need.

Carousel storer GIROCLASS adapts perfectly to the available surface and to the characteristics of the products stored.

## Optimize your working space!

The principle of vertical storage means you can save up to 90% footprint. By using under-ceiling height which is generally never used (over one or several floors), you can store your files much more densely.

## Save time searching for your files!

The design of the GIROCLASS automated storer means you can access all your documents very quickly. Light indicators ensure you can immediately identify where your file is stored on the automatic storer shelf: as such you increase productivity whilst ensuring your one-place centralized files are constantly available.
