Electroclass values

At Electroclass, we are convinced that reliable information and optimizing your storage and logistics flow management are key to ensuring the success of your business. This is why we have been imagining reliable, secure bespoke logistics solutions for over 38 years to help you match your productivity targets and, at the same time, enhance your working conditions.

As a long-term partner, we are more than aware that human relationships and service quality are paramount to the success of any joint projects. With our 32 Electroclass technicians working across France, our day-to-day focus is combining quality with swift action. In short, you’re in good hands!
